

Functional Requirements Document

FRD - Functional and Non-Functional Requirements

Document ID	EC-BA-003-FRD
Version	1.0
Project	E-Commerce Sales & Customer Analytics
Period	January 2023 - April 2023
Status	Baseline / Portfolio Case Study

Portfolio note: Simulated case study using illustrative requirements, roles and data.

1. Purpose

Translate approved business needs into functional and non-functional requirements that can be designed, developed and tested.

2. Functional Requirements

ID	Functional Requirement	Priority
FR-001	Display Total Revenue, Total Orders and Average Order Value.	Must
FR-002	Filter dashboard results by date period.	Must
FR-003	Filter dashboard results by region.	Must
FR-004	Filter by product category.	Must
FR-005	Display monthly revenue trend.	Must
FR-006	Compare revenue across regions.	Should
FR-007	Display category revenue contribution.	Should
FR-008	Distinguish new and repeat customers.	Must
FR-009	Display return rate and return volume.	Must
FR-010	Support drill-down where underlying data permits.	Should
FR-011	Use approved KPI calculation rules.	Must
FR-012	Display data refresh date/time.	Must
FR-013	Do not silently present invalid/unavailable data as valid.	Must
FR-014	Apply role-based access to authorized users.	Must
FR-015	Map UAT cases to functional requirements.	Must

3. KPI Definitions

KPI	Definition	Owner
Total Revenue	Sum of qualifying completed-order revenue.	Finance / Sales
Total Orders	Count of qualifying completed orders.	Sales
AOV	Total Revenue divided by qualifying orders.	Sales / Finance
Repeat Customer Rate	Repeat customers divided by total customers under the agreed rule.	Marketing
Return Rate	Returned qualifying orders divided by qualifying orders.	Operations

4. Non-Functional Requirements

- Performance: dashboard should meet an agreed business response threshold.
- Security: sensitive customer information is restricted by role.
- Usability: KPI labels and filters are understandable to business users.
- Data Quality: critical KPIs are validated against approved source data.
- Auditability: definitions and changes are traceable.
- Maintainability: business rules are documented separately from visuals.

5. Acceptance Criteria Examples

- Given a selected date range, Total Revenue reflects only qualifying orders in that period.

- Given a selected region, applicable KPIs and visuals update consistently.
- Finance reconciliation matches the approved KPI rule within the agreed tolerance.
- Unauthorized users cannot access restricted customer fields.

6. Traceability

Each requirement receives a unique ID and is traced to the relevant business requirement, user story, test case and UAT result. Approved changes retain version history.
