

Business Requirements Document

BRD - Business Requirements

Document ID	EC-BA-003-BRD
Version	1.0
Project	E-Commerce Sales & Customer Analytics
Period	January 2023 - April 2023
Status	Baseline / Portfolio Case Study

Portfolio note: Simulated case study using illustrative requirements, roles and data.

1. Executive Summary

The business requires a standardized analytics capability to improve visibility into sales, customer behavior, regional performance and returns. This document captures the business requirements for a management reporting and analytics solution.

2. Business Problem

- Sales and customer reports are distributed across inconsistent spreadsheets and extracts.
- Management lacks a single trusted view of revenue, orders, customers and returns.
- Teams use different KPI definitions, creating reconciliation effort.
- Customer retention and regional trends are difficult to identify quickly.
- Manual reporting consumes analyst and management time.

3. Business Objectives

- Provide a consistent set of approved KPIs.
- Analyze revenue and orders by time, region, category and product.
- Improve visibility into new versus repeat customers.
- Identify return trends and operational exceptions.
- Reduce manual reporting and reconciliation effort.
- Support faster evidence-based decisions.

4. Scope

- In scope: sales/order reporting, customer analysis, regional/category analysis, returns, KPI definitions, dashboard requirements, UAT and sign-off.
- Out of scope: replacement of the transaction platform, payment gateway redesign, ML recommendation engine, customer mobile-app changes, enterprise data-warehouse modernization.

5. Stakeholders

- Project Sponsor
- Business Owner - Sales
- Marketing Manager
- Operations Manager
- Finance Manager
- Product Manager
- BI / Data Lead
- QA Lead
- Business Analyst

6. Business Requirements

ID	Requirement	Priority
BR-001	Provide a standardized management sales view.	Must
BR-002	Report revenue by month, region, category and product.	Must
BR-003	Distinguish new and repeat customers.	Must
BR-004	Provide return-rate visibility.	Must
BR-005	Document and approve KPI definitions.	Must

ID	Requirement	Priority
BR-006	Support agreed filters and drill-down dimensions.	Should
BR-007	Identify and communicate data-quality exceptions.	Must
BR-008	Restrict sensitive information to authorized users.	Must
BR-009	Complete UAT before business sign-off.	Must
BR-010	Use change control for approved-scope changes.	Must

7. Success Measures

- Reduced recurring report-preparation effort.
- Improved consistency between Sales and Finance KPI results.
- Management can identify underperforming regions/categories without manual consolidation.
- Business users accept dashboard results during UAT.
- Approved KPI definitions are reused across reporting.

8. Assumptions and Risks

- Source systems contain sufficient sales, customer and return fields.
- Business owners are available for validation.
- Customer access follows security rules.
- Historical data may require cleansing or reconciliation.
- Late feedback or scope expansion may affect delivery.
