

Requirements Elicitation Questionnaire

Stakeholder Interview and Workshop Questionnaire

Document ID	EC-BA-003-REQ
Version	1.0
Project	E-Commerce Sales & Customer Analytics
Period	January 2023 - April 2023
Status	Baseline / Portfolio Case Study

Portfolio note: Simulated case study using illustrative requirements, roles and data.

1. Business Context

- What business problem should the reporting solution solve?
- Which decisions depend on sales/customer reports?
- Which business outcomes matter most to leadership?
- What reports or spreadsheets are currently used?

2. Current-State Pain Points

- What manual steps are involved in reporting?
- Where are delays or reconciliation issues?
- Which KPI values are disputed?
- What data-quality issues are known?

3. KPI Requirements

- Which KPIs are mandatory?
- How does Sales define revenue? How does Finance define it?
- How should an order be counted?
- How should returns affect reporting?
- How should repeat customers be defined?

4. Analysis Dimensions

- Which dimensions are required: date, region, category, product, channel or customer?
- Which filters are required?
- What drill-downs are needed?
- Which comparisons are most useful?

5. Dashboard and Reporting

- Who will consume the dashboard?
- How often should data refresh?
- What should the landing page show?
- Which charts or tables are essential?
- Are exports or sharing required?

6. Data and Integration

- Which systems contain sales, customer and return information?
- Who owns each source?
- What historical period is available?
- How are duplicates and missing values handled?
- How is reconciliation performed today?

7. Security

- Which roles can view customer-level data?
- Are exports restricted?
- How long should data be retained?
- Which organizational security policies apply?

8. UAT and Success

- What scenarios must pass before release?
- Who performs UAT?
- What is a critical defect?
- Who gives final sign-off?
- How will success be measured after implementation?

9. Workshop Closure Checklist

- Requirements captured and prioritized.
- Open questions recorded.
- Assumptions and dependencies recorded.
- Requirement owners identified.
- Actions assigned.
- Business validation date agreed.
